

ENVIRONMENTAL POLICY

Environmental care is a significant and indispensable segment of **AIGO BS Ltd. Belgrade** business operation.

AIGO BS Ltd. Belgrade chooses to nurture a continuous improvement of environmental protection in relation to its fields of activity through a systematic approach to the activities it conducts and constant raising of its employees' environmental awareness.

This allows for a socially responsible attitude of the company towards the environment, considering environmental care as a relevant part of fulfilling the company's long-term successful business operations, and partaking in the global sustainable development of environment protection.

An important factor in the success of improving environmental performance is the established international standard ISO 14001:2015, which is implemented in the key processes of the company, namely trading in computers, printers, printer supplies, office supplies, computer, printer and photocopier servicing, data processing and variable data printing, as well as wholesale – import, export, procurement, storage and distribution of medical equipment.

Striving to continuously fulfill environmental standards, **AIGO BS Ltd. Belgrade** regularly engages in the following business activities:

- ❖ top management's work on integrating the requirements for the environmental management system into the business processes of the company;
- ❖ identifying all environmental aspects and controlling the aspects that have been recognized as relevant by using appropriate methodology;
- ❖ specifying documented general and specific environmental objectives and programs for their accomplishment, which include all the necessary resources to achieve them;
- ❖ implementing, applying and maintaining regular processes of monitoring and measuring the key characteristics of its operations that may have a significant environmental impact, for the purpose of evaluating the company's environmental performance;
- ❖ identifying and harmonizing business operations with applicable laws, regulations, codes and standards in the field of environmental protection, as well as with contract clauses;
- ❖ prevention of environmental pollution through adequate management of waste generated by the company through its regular operation, in compliance with laws, standards and regulations in force;
- ❖ environmental risk management by employing appropriate methodology;
- ❖ reviewing and fulfilling the requirements, needs and expectations of all identified stakeholders in the domain of environmental protection;
- ❖ continuous environmental education of all employees for their full engagement in the company's environmental development;

In order to apply and implement the formulated Environmental Policy, we expect full support from all employees.

In Belgrade, 05.02.2020.
